Build custom, presentation-quality reports

Place reports together using a "building block" approach that facilitates professional design and maintenance and helps ensure each report communicates the right information.

Improve information analysis

Export Microsoft FRx reports to Microsoft Office Excel PivotTable®/PivotChart® formats, to enhance understanding of key business information.

Reduce administrative work

Automate report processing and distribution capabilities to reduce the time employees spend on administrative work, freeing them to analyze information and make informed, strategic decisions.

Simplify the report building process

Benefit from the familiar spreadsheet look and feel and allow anyone with the appropriate privileges—from the CEO to the marketing analyst—to create customized reports quickly and easily.

Maintain reports seamlessly

Eliminate time-consuming processes for updating and maintaining reports through tight integration with Microsoft Business Solutions—Great Plains®.

Enhance corporate communications

Use multiple report formats and distribution techniques to ensure the right financial information is being delivered to the right people.

Access reports securely

Establish custom security settings to help ensure information is accessed only by users who have secure access rights.

The screenshot shows two overlapping windows. The top window is a spreadsheet with columns for Description, File Code, Period, Rate/Rate/Unit, Name, Est, F, P, D, C, M, N, and General Ledger. The bottom window is a finished report titled 'FilmWorks Demo' showing a 'Current Month' summary for April, May, and June, with a YTD total. The report includes sub-sections for Revenue, Gross Margin, and Operating Expenses.

THE SPREADSHEET LOOK AND FEEL makes it easy for anyone with appropriate access privileges to create customized reports.

FINISHED FRX REPORTS are presentation-quality, with drill-down capabilities that let you pinpoint detailed information.

Microsoft FRx Professional

Powerful Analysis Features

View and manage financial information from all angles to gain a complete, detailed understanding of any business situation. Powerful analysis capabilities for Microsoft FRx Professional include the ability to:

- Consolidate information from multiple companies and data sources.
- Create reports that compare periods and then set the current base month, quarter, or other financial period at the time you run the report.
- Create reporting relationships that need not exist in your chart of accounts, allowing you to change reporting structures without affecting data entry processes.
- Seamlessly translate currency across multiple accounting systems—including functionality for calculating monthly and annual average and historical rates—and quickly set up currency exchange rate tables with information pulled from the general ledger.

Rapid Report Design and Delivery Processes

Create sophisticated reports easily and intuitively, and define distribution methods for reports to efficiently and effectively address your organization's business needs. Microsoft FRx Professional functionality includes:

- A graphical user interface that helps you determine the description and source of data, as well as any calculations and totals in your report.
- Tight integration across Microsoft Great Plains to facilitate updates and maintenance and reduce the chance of errors.
- Customizable and automated process that lets you select when and how each report should be generated and distributed.
- The FRx Report Server, which automates the production and distribution of reports in a scalable, high-speed reporting environment.

Microsoft FRx Professional

Microsoft FRx Report Manager

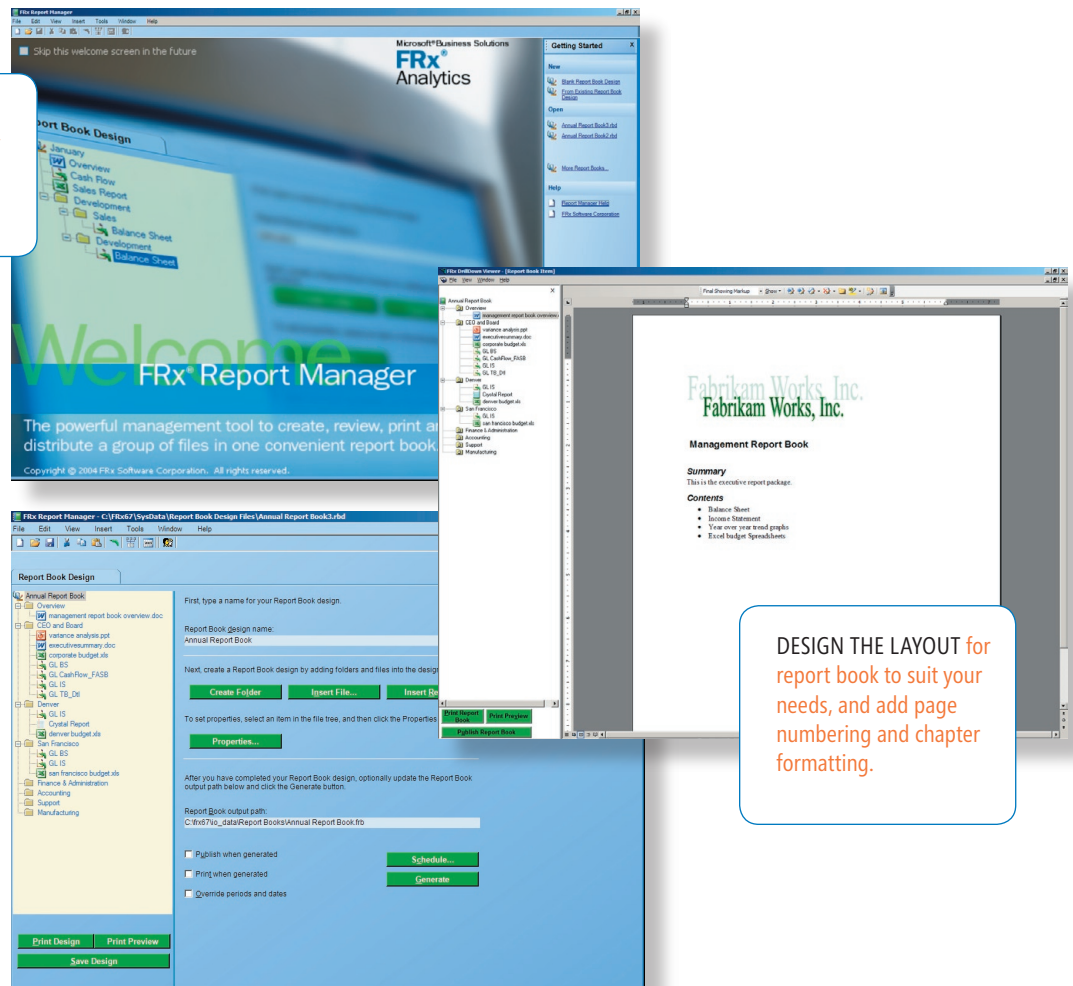

Improve information visibility and easily share the right information with the right people. Available as an add-on to Microsoft FRx Enterprise, the FRx Report Manager empowers you to:

- Create personalized report books that organize multiple document types in a single file—including Microsoft FRx reports, Microsoft Office documents, Crystal Reports, and links to sites and other documents.
- Consolidate critical business information into a single file for quick, easy distribution to executives and managers.
- Select from multiple delivery methods to share report books, including e-mail, print, or online posting.

AUTOMATE THE CREATION and delivery of personalized report books.

SHARE AND VIEW COMPREHENSIVE INFORMATION from FRx reports and other reports and documents using the FRx DrillDown Viewer™.

DESIGN THE LAYOUT for report book to suit your needs, and add page numbering and chapter formatting.

Microsoft FRx Professional

FEATURES OVERVIEW

Report Designer	Use a “building block” approach to design reports, defining the rows and columns that will appear with a reporting tree that establishes the relationship between reporting units.
Report Analysis	Consolidate information from multiple companies and data sources or create custom relationships. Analyze transaction-level detail with the FRx DrillDown Viewer...
Report Relationship Customization	Create new reporting relationships by changing the reporting structure, without affecting data entry processes or rearranging account segments in the general ledger.
Multiple Report Delivery Formats	Select multiple delivery methods for reports, including publication via the FRx DrillDown Viewer, posting to a Web portal, or delivery via e-mail or print.
Web-Based Reports	Publish, store, manage, and enable online administration of reports in a secure Intranet or Internet environment using FRx WebPort, while maintaining drill-down and printing functionality.
OLAP Output Support	Export information from Report Designer directly into an Excel pivot table or chart that supports Online Analytical Processing (OLAP).
Custom Security Settings	Set security by Reporting Tree level to help ensure information is accessed by users with appropriate permission rights.
Currency Translation	Seamlessly translate currency across multiple accounting systems, including functionality for calculating monthly and annual average and historical rates. Use the Currency Rate Maintenance Wizard to quickly set up currency exchange rate tables with information pulled from the general ledger.
Automate Report Delivery and Production	Use the FRx Report Server to automate the production and distribution of reports in a scalable, high-speed reporting environment.
XBRL Support	Create and publish reports that utilize the Extensible Business Reporting Language (XBRL) 2.0 specification to enhance your ability to transfer complex, highly confidential corporate financial information to regulators, banks, investors, and boards of directors using a trusted standard of financial communication.
