

# Distribution - Solomon

Capture actual shipping, handling, and import fees (landed costs) and easily roll them into the total cost of goods. With Microsoft® Business Solutions–Solomon Landed Cost, distributors and manufacturers can calculate accurate inventory valuation by including additional charges beyond item purchase costs, such as miscellaneous origin and destination fees.

## LANDED COST

### Accurately

account for all inventory costs as soon as your inventory is delivered to the warehouse door.

### Improve accountability

Help ensure accurate cost and profit analysis by accounting for all the costs incurred for the delivery of inventory to the warehouse door, whether the costs are known at receipt or sometime thereafter.

### Reduce manual effort

Update inventory costs for items with valuation methods, FIFO, LIFO, Average Cost, and Specific Identification with Multiple Valuation Method support. Avoid adjusting entries after the fact by automatically updating inventory values and financial ledgers according to the appropriate rules of each valuation method.

### Work with multiple currencies

Effectively record and account for the landed costs associated with goods acquired from international suppliers using multiple currencies. With bi-monetary support in Microsoft Solomon Inventory, valuations updated by landed costs can be represented in the inventory's alternate currency.

The screenshot displays three overlapping software windows from Microsoft Business Solutions:

- Landed Cost Codes (61.100.00):** A table listing various cost codes and their descriptions.
 

Landed Cost Code	Description	Application Method	Allocation Method	Vendor ID	Terms ID	Reason Code	Clearing
1 AFPCOST2	LC code, cost, voucher	Voucher	Cost			LCMISC	4235
2 APQTY1	LC code, quantity, voucher	Voucher	Quantity			LCMISC	4235
3 APWT3	LC code, weight, voucher	Voucher	Weight			LCMISC	4235
4 POAPCOST2	LC code, cost, both	Both	Cost	VT0110	05	LCMISC	4235
5 POAPQTY1	LC code, quantity, both	Both	Quantity	VT0110	05	LCMISC	4235
6 POAPWT3	LC code, weight, both	Both	Weight	VT0110	05	LCMISC	4235
7 POCOST2	LC code, cost, receipt	Receipt	Cost	VT0110	05	LCMISC	
8 POQTY1	LC code, quantity, receipt	Receipt	Quantity	VT0110	05	LCMISC	
9 POWT3	LC code, weight, receipt	Receipt	Weight	VT0110	05	LCMISC	
- Receipt/Invoice Entry (04.010.000):** A form showing receipt details for 10/28/2003.
 

Batch	Batch Number	Status	Qty Control	Cost Control
	000149	On Hold	8,000	460.99
Period to Post:	06-2002	Handling:	8,000	460.99
- Landed Cost Receipt Entry (61.010.000):** A smaller window showing a specific landed cost entry.
 

Landed Cost Code	Allocation Method	Vendor ID	Landed Cost	Receipt Number	PO Num.
1 POAPQTY1	Quantity	VT0110	4.00	000053	000075

### Adding

landed costs to your inventory valuation enables you to calculate an accurate cost and profit analysis.

## LANDED COST | FEATURES AND FUNCTIONALITY

### Superior Accountability

Gain more accurate accounting of the total costs incurred in acquiring goods to account for costs related to duty, freight, and insurance, which are often added after the fact.

### Inclusive Handling

Account for charges above and beyond the costs applied to merchandise at the time of purchase order invoice/receipt entry.

### Cost-Effective Administration

Manage profitability effectively by rolling the actual shipping, handling, and import fees into the total cost of goods.

### Precise Valuations

Streamline and improve procedures to correctly update inventory values for costs incurred after goods are received according to their individual valuation methods.

### Streamlined Data Entry

Microsoft Solomon Landed Cost automatically updates inventory values and financial ledgers according to the appropriate rules of each valuation method to ease manual tasks and help avoid adjusting entries after-the-fact.

### Multi-Currency Support

Convert and record landed costs incurred from international suppliers easily. Enter values in their original currency for automatic conversion to your base currency, ensuring a quick, easy, and accurate valuation.

### Profitability Reporting

Accurately represent the true costs of used and tracked inventory goods to reflect the correct profitability of your project. Landed costs are automatically allocated to inventory goods received and posted to the specified project.

### Cost Grouping

Landed costs can be allocated to inventory items based on quantity, cost, or weight.

### After-the-Fact Updates

Record landed costs subsequent to the receipt of goods. Costs entered after the fact will also update inventory value. Landed costs applied to inventory goods received for a specific project will automatically record and allocate the additional costs to the project.
